- Our fees encompass all pre and post-operative care associated with in-patient or day case surgery and include the management of all common complications related to the condition including bleeding, IV fluids, suction, catheterisation, uncomplicated sepsis and removal of sutures;
- Where a surgeon administers local anaesthetic or sedation then the H3 multiple coding criteria applies only in instances where the combination of procedures is allowable under CCSD coding rules (please refer to Section 3 – Multiple Procedures);
- Bilateral procedures are allocated a specific code in most cases. Where no code exists for a specific bilateral procedure you intend to perform, please contact claims@h3insurance.com for guidance, quoting the patient's claim reference number;
- Where procedures are anticipated to be particularly complicated or a second surgeon will be required, please contact claims@h3insurance.com for preauthorization;
- Where procedures are not listed, please contact claims@h3insurance.com for guidance.

3. Multiple procedures

H3 will only accept additional billing for multiple procedures when the additional procedure(s) are accepted as legitimate unbundled second or third procedures by CCSD coding criteria. Please refer to <http://www.ccsd.org.uk/CCSDSchedule> if further clarification is required. Multiple procedures must be billed as follows:

- Two Procedures: 100% of first procedure + 50% of second procedure
- Three or more Procedures: 100% of first procedure + 50% of second procedure + 25% of third procedure

4. Anaesthesia

- No additional benefit is payable for the application of local anaesthesia and/or sedation where H3 considers this to be an integral part of the procedure based on accepted, standard medical practice. These procedures are indicated by a * in the schedule and the published fee is the maximum payable by us, inclusive of any anaesthesia and/or sedation.
- The same anaesthetic criteria applies irrespective of whether general or regional anaesthesia has been administered and the benefit maxima includes routine pre-operative assessment, induction, maintenance of anaesthesia and all support activities both intra and post-operative, pain control throughout the hospital stay and post-operative care including 72 hours Intensive Therapy;
- When an epidural is administered in addition to general anaesthesia during the subsequent in-patient stay, then H3 multiple procedure charging criteria apply;
- In certain instances below where co-morbidities exist and safe practice has required a separate pre-operative anaesthetic assessment in advance of surgery to determine choice of anaesthetic or to determine whether it is safe to proceed with surgery; a pre-operative anaesthetic fee applies. A maximum fee of £90 per patient is allowable for this.
